

Wendy Kirkland and the MERIT Gold System

The Gold ETFs are extremely liquid. In other words, both entries and exits are guaranteed because of the number of shares traded. On average, more than 107 million per day between the top 5.

That also means that, when you trade the Gold ETFs, you have automatic liquidity. Because of the high open interest, high volume, the Gold ETFs are a lower-risk trading vehicle.

Plus, when you look at the Gold ETF option chains, you will see that the spread between the “bid” and the “ask” is often a penny or two. This means the amount the ETFs’ price needs to move before you see a profit is quite small.

In every other respect, the Gold ETFs are and act like every other single equity or security. You don’t need to learn any special chart indicators to interpret these Gold ETFs.

Also, remember these Gold related ETFs trade until 4:15 PM ET, an extra 15 minutes.

Total Trades.....402	The average days per trade is 3-days
Winning Trades329 81.84%	The average profit per trade is \$295.87
Losing Trades 73 18.16%	The average profit per winning trade is \$389.99
Total Profit..... \$118,941	The average loss per losing trade is \$168.85
Winning Trades \$131,267	
Losing Trades \$(12,326)	

Stock and option trading have large potential rewards, but also large potential risks. You must be aware of the risks and willing to accept them in order to invest in the market. Don’t trade with money you can’t afford to lose. This is neither a solicitation nor an offer to buy/sell any stock.
